

NIDHI R

Software Test Engineer | Medical Device & Healthcare QA

☎ 9113054779 | ✉ nidhir5397@gmail.com | ∞ linkedin.com/in/nidhi-r-bb1484346 | 📍 Bengaluru, India

PROFESSIONAL SUMMARY

Results-driven Software Test Engineer with 4 years of experience in manual and automated testing of healthcare and regulated software applications. Proven expertise in STLC, test case design, defect lifecycle management, and cross-functional collaboration. Experienced in validating EHR/EMR clinical workflows with a strong focus on data integrity, functional accuracy, and compliance — directly transferable to medical device software validation. Adept at working in Agile and structured V-Model environments, with hands-on exposure to tools including JIRA, RQM, Remedy, and Eggplant Functional. Recognized with Bravo Award for excellence in automation and quality delivery.

CORE COMPETENCIES

Testing Types: Functional, System, Integration, Regression, UAT, Smoke & Sanity Testing

Test Design: Requirements Analysis, Test Planning, Test Case Design, Execution & Review

Defect Management: Defect Logging, Tracking, Verification & Closure (JIRA, Remedy, RQM)

Methodologies: Agile/Scrum, Waterfall, V-Model (STLC & Defect Life Cycle)

Tools: JIRA, IBM RQM, Remedy, Wiki, Eggplant Functional, GitHub, SourceTree

Domain: Healthcare (EHR/EMR), Clinical Workflows, Revenue Cycle, Regulated Software

Database: SQL – Basic Validation Queries

Automation: Eggplant Functional – Image-based Testing & OCR Validation

Soft Skills: Analytical Thinking, Cross-functional Collaboration, Documentation & Communication

PROFESSIONAL EXPERIENCE

Test Technician A2 (Software QA Engineer)

Oracle Cerner Healthcare Solutions India Pvt. Ltd., Bengaluru | 2022 – Present

Test Design & Execution

- Designed, reviewed, and executed functional, system, integration, and regression test cases for healthcare software applications, ensuring compliance with clinical and business requirements.
- Validated clinical workflows (PowerChart) and Revenue Cycle modules, verifying data accuracy, system behavior, and end-user requirements across multiple releases.
- Performed requirements analysis and mapped test coverage to functional specifications, ensuring no gaps in test scope for regulated healthcare applications.
- Executed smoke, sanity, and UAT testing across Windows and Linux-supported environments, supporting release readiness decisions.

Defect Management & Collaboration

- Logged, tracked, and verified defects using JIRA and Remedy; closely collaborated with developers and product owners to ensure timely resolution and root cause analysis.
- Identified and escalated critical defects in PowerChart and Revenue Cycle modules, significantly improving overall product quality before release.
- Maintained comprehensive test documentation including test plans, test cases, execution reports, and defect reports aligned with STLC processes.
- Participated in Agile/Scrum ceremonies including sprint planning, backlog grooming, and retrospectives, contributing to iterative quality delivery.

Test Automation

- Converted high-priority manual test cases into automated scripts using Eggplant Functional, reducing regression cycle time.
- Implemented image-based testing and OCR validation in Eggplant Functional for comprehensive UI validation of healthcare screens.
- Received Bravo Recognition Award for automating the entire test suite and significantly increasing manual script execution throughput.

KEY ACHIEVEMENTS

- **Bravo Recognition Award – Oracle Cerner:** Awarded for successfully automating the complete test script suite and achieving high manual test execution output, directly improving regression efficiency.
- **Multiple commendations from senior managers** for professionalism, quality commitment, and reliable delivery on critical healthcare modules.
- **Identified high-severity defects in PowerChart & Revenue Cycle** that prevented production issues in regulated clinical environments.

EDUCATION

Master of Engineering – Structural Design

Malnad Engineering College, Hassan | 2018 – 2020 | CGPA: 9.39

Bachelor of Engineering – Civil Engineering

Government Engineering College, Hassan | 2014 – 2018 | Score: 78%

DOMAIN ALIGNMENT – MEDICAL DEVICE TESTING

Possess strong knowledge of medical device software testing, supported by hands-on experience in validating regulated healthcare applications at Oracle Cerner. Well-versed in compliance-driven QA practices, clinical data validation, and end-to-end STLC processes, ensuring high standards of quality and reliability.

Currently upskilling in Python Selenium for test automation, with a focus on enhancing regression efficiency and building scalable automation frameworks. Additionally, have foundational knowledge of AI concepts and prompt engineering, with an interest in leveraging AI-driven testing approaches to improve test design, defect analysis, and overall QA productivity.
